

What is claimed is:

- 1 1. A portable mouth wash system, comprising:
 - 2 a dual chamber container having a cylindrical body portion, including a first
 - 3 end and a second end being directly opposite to one another, a transverse divider
 - 4 within the body portion dividing the body portion into a first chamber and a second
 - 5 chamber, and a sealable opening in each of the first chamber and the second chamber,
 - 6 the sealable openings being disposed at the first end and the second end of the body
 - 7 portion;
 - 8 a first quantity of mouth cleansing liquid disposed in the first chamber;
 - 9 a second quantity of mouth rinsing liquid disposed in the second chamber; and
 - 10 a closure for sealing each of the sealable openings to contain the mouth
 - 11 cleansing liquid and the mouth rinsing liquids within their respective chambers.
- 1 2. The portable mouth wash system of claim 1, wherein the mouth cleansing
- 2 liquid is an aqueous solution of hydrogen peroxide.
- 1 3. The portable mouth wash system of claim 1, wherein the mouth rinsing liquid
- 2 is pure water.
- 1 4. The portable mouth wash system of claim 1, wherein the dual chamber
- 2 container is made of a plastic material.
- 1 5. The portable mouth wash system of claim 1, wherein the closure is a pull-tab.

1 6. The portable mouth wash system of claim 1, wherein the closure is a screw
2 cap.

1 7. A portable mouth wash system, comprising:
2 a dual chamber container having a body portion, a divider within the body
3 portion dividing the body portion into a first chamber and a second chamber, and a
4 sealable opening in each of the first chamber and the second chamber;
5 a first quantity of mouth cleansing liquid disposed in the first chamber;
6 a second quantity of mouth rinsing liquid disposed in the second chamber; and
7 a closure for sealing each of the sealable openings to contain the mouth
8 cleansing liquid and the mouth rinsing liquids within their respective chambers.

1 8. The portable mouth wash system of claim 7, wherein the mouth cleansing
2 liquid is an aqueous solution of hydrogen peroxide.

1 9. The portable mouth wash system of claim 7, wherein the mouth rinsing liquid
2 is pure water.

1 10. The portable mouth wash system of claim 7, wherein the dual chamber
2 container is made of a plastic material.

1 11. The portable mouth wash system of claim 7, wherein the closure is a pull-tab.

1 12. The portable mouth wash system of claim 7, wherein the closure is a screw
2 cap.

1 13. The portable mouth wash system of claim 7, wherein the first chamber has a
2 first volume and the second chamber has a second volume different from the first
3 volume.

1 14. A portable personal care system, comprising:
2 a dual chamber container having a body portion, a divider within the body
3 portion dividing the body portion into a first chamber and a second chamber, and a
4 sealable opening in each of the first chamber and the second chamber;
5 a first personal care liquid disposed in the first chamber;
6 a second personal liquid disposed in the second chamber; and
7 a closure for sealing each of the sealable openings to contain the first and second
8 personal care liquids within their respective chambers.

9 15. The portable personal care system of claim 14, wherein the body portion is
10 cylindrical in shape and includes a first end and a second end being directly opposite
11 to one another.

1 16. The portable personal care system of claim 15, wherein the sealable openings
2 are disposed at the first end and the second end of the body portion.

1 17. The portable personal care system of claim 14, wherein the dual chamber
2 container is made of a plastic material.

1 18. The portable personal care system of claim 14, wherein the closure is a pull-
2 tab.

1 19. The portable personal care system of claim 14, wherein the closure is a screw
2 cap.

1 20. The portable personal care system of claim 14, wherein the first chamber has a
2 first volume and the second chamber has a second volume different from the first
3 volume.
